Description

Some views you drive to see. These, you get to wake up to every day. Set on 2 or more private acres, these lots put the Black Hills right in your everyday backdrop, with enough space around you that the view never gets interrupted. Electric and water are already available, with light covenants in place to help protect property values while still giving your builder plenty of flexibility to bring your vision to life. Even with all this privacy, town and everyday essentials stay close, just five to ten minutes away. This is the setting people spend years searching for: seclusion without isolation, space without sacrifice, and views that do not fade. For lots this size, in a location this good, the value speaks for itself. These are a must see. Reach out today and we'll walk you through them in person.
